Systems and Hardware: Windows installation and configuration, PC maintenance and imaging, hardware troubleshooting, user onboarding

## PROJECTS

**LyftTrack** — React Native (Expo), Next.js, TypeScript, Supabase

- Workout tracking app built as a monorepo: mobile/web client in Expo Router and a landing page in Next.js.
- Email and Google authentication, onboarding, live workout sessions with sets and rest timers, routine templates, statistics and body measurements.
- Social feed with likes, comments and public profiles; user profile with photo, settings and multilingual support (PT/EN).
- Basic offline support with sync; database managed through SQL migrations on Supabase.

**Bilingual Personal Portfolio** — Next.js 15, React 19, TypeScript, Tailwind CSS v4, Framer Motion

- Bilingual (PT/EN) portfolio with smooth scrolling (Lenis), scroll-driven animations, parallax sections and an interactive custom cursor.
- Dark mode applied on first paint to prevent flash of unstyled content, plus a high-contrast light mode palette.
- Contact form with strict Zod schema validation on both client and server, in-memory per-IP rate limiting against spam, and email delivery through the Resend API.
- Configured Content Security Policies and isolation of environment variables and API keys.
